BIO

Ali Heyat is an Associate at P&A, based in the firm's Miami office. Leveraging a solid foundation in civil engineering and construction management, he brings a unique perspective to his practice, bridging technical and legal disciplines to resolve complex construction-related disputed and transactional matters.

Ali earned his Bachelor of Civil Engineering from Auburn University before joining the construction industry, where he managed in-house trade scopes for one of the nation's leading general contractors. In his role within the self-perform group, Ali specialized in managing reinforced concrete and drywall, supporting projects from the bid stage to through close-out. His experience also includes overseeing client-direct work within self-perform, giving him a deep understanding of both contractor and client priorities.

While pursuing his J.D., Ali served as a legal intern with another large general contractor and construction technology company, where he deepened his understanding of risk management, contract analysis, and technology's evolving role in construction. He also served as a law clerk with P&A prior to becoming an associate and currently serves as a Teaching Assistant for a Fundamentals of Construction Management course at Nova Southeastern University. Ali received his J.D. from Samford University and his B.C.E from Auburn University.

HIGHLIGHTS
